OVER THE YEARS, WE HAVE DEVELOPED MANY ADDITIONAL FEATURES FOR OUR EAS SYSTEMS. USEFUL FEATURES, BUT YOU DON'T WANT THEM CLUTTERING YOUR STORE ENTRANCE. THEREFORE WE'VE DEVELOPED A WAY TO INTEGRATE ALL THESE FEATURES INTO OUR EAS ANTENNAS, LEAVING YOUR STORE ENTRANCE OPEN AND INVITING TO CUSTOMERS.

customer counting

When, where and how many customers come into your stores is valuable information. Our customer counting gives you accurate data on the traffic in your stores. You'll know how customers react to campaigns, and their dwell time. You can calculate your conversion rate. At peak times and slow times, you'll always know how many staff you need.

metal detection

Our patented, integrated metal detection is truly unique. While you do your best to make sure any goods leaving the store have actually been paid for, some shoplifters use special foil-lined bags to prevent detection of EAS labels. Metal detectors integrated into our antennas catch anyone entering your store with these types of bags or coats.

ad space

You probably see security as a necessity. But you can turn it into your own advantage! We've designed special antennas with integrated poster space so you can combine anti-theft technology with the benefits of advertising in a high-traffic area.

extended warranty

Our cost-efficient and sustainable solution. You can resolve up to 80 percent of all service calls remotely. No worries or hassle. Reliable and functional systems at all times. Over 30,000 stores worldwide rely on the quality of our online services.

CUSTOMER SERVICE IS THE KEY TO HIGH SALES FIGURES.

STORE EMPLOYEES MUST DEVOTE AS MUCH TIME AS

POSSIBLE TO YOUR CUSTOMERS, NOT TO TAGGING

MERCHANDISE. OUR SOURCE TAGGING PROGRAM REDUCES

IN-STORE LABOR: ALL MERCHANDISE ARRIVES READY FOR SALE.

more time
for your
customers

source tagging

Save time without compromising on quality. Have EAS security labels applied on the supply side, not in the retail outlet. You can rely on our technology; we know a chain is only as strong as its weakest link. This is why we've perfected quality control at all stages of the process.

labels

Reliability is the key to a good security system. Our labels are tested according to international standards. Before our labels are delivered, they are subjected to extensive tests to guarantee our high quality standards. That's why every single label we produce is guaranteed to work.

We're here to help you think of ways to increase your store performance. This kind of cooperative thinking has led to innovations such as a new mascara tag:

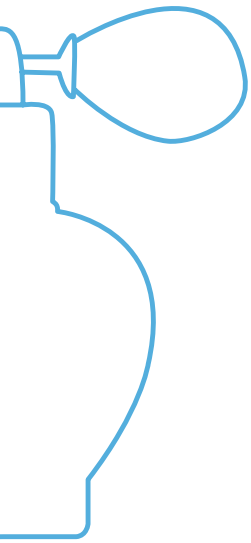

"This new security tag for mascara products not only works great, it has increased our trust in the security of our products. We dare to put more products on display and this has led to more sales."

showcase & line security

We deliver showcases and line security in different shapes and sizes. We understand that many products need to be stored safely, and that you need quick access any time a customer wants a closer look. With our easy access control, you won't need bunches of keys and security codes. One simple card gives you control over the situation.

with our world-wide and flexible network of business partners, we can supply and support you around the globe.

global logistics, installation and servicing

We offer a global and flexible network of certified partners and subsidiaries, we serve customers across the globe. Thanks to our own production plant, we can respond flexibly to large-scale international orders. Please visit our website to find a Nedap Retail business partner in your local area.
